AV Commissioning Checklist

Generated on 2026-04-14

- 1. Verify power, grounding, and electrical protections
- 2. Validate all signal paths (audio, video, control)
- 3. Confirm network addressing, VLANs, and routing
- 4. Run latency and sync checks (audio/video/PTP)
- 5. Validate room presets and automation event logic
- 6. Check emergency and manual override behavior
- 7. Perform user acceptance test with real content
- 8. Capture as-built documentation and final backups
- 9. Deliver handover package + operator training notes
