

RF Coordination Checklist

Generated on 2026-04-14

- 1. Perform venue scan for occupied frequencies
- 2. Import legal band plan for region/country
- 3. Build coordinated frequency list with intermod analysis
- 4. Separate critical channels into protected groups
- 5. Validate antenna gain and cable loss budget
- 6. Confirm diversity mode and receiver RF thresholds
- 7. Walk-test coverage in all audience and stage zones
- 8. Define backup frequencies and failover procedure
- 9. Export coordination report and attach to show file
